

KINDERGARTEN ENRICHMENT

Helping Your Child Be Successful in School

Starting Kindergarten is a huge milestone in a child and family's life and you want to know your child has a safe and supportive place to go after school. At CDI/CDC we believe our programs nurture healthy school habits and develop well rounded children. We foster a sense of belonging while encouraging creative expressions and a healthy lifestyle.

Curriculum

Our Kindergarten curriculum enhances English Language Arts, Math, Science, and Social Studies skills through project-based learning. We use KidzLit and KidzMath research-based curricula designed specifically for use in afterschool programs. They enhance a child's motivation to read and build core values.

Partnerships

At CDI/CDC, family and school partnerships are key to Kindergarten children's success. Our partnerships support the bridge from school day to home.

Daily Schedule

Our daily schedule provides children with opportunities to work individually, in small groups, and in large groups. Throughout the day, they are given opportunities to work collaboratively, independently, and to explore and manipulate the materials available.

Environment

Our environments are designed specifically to support the needs of Kindergarten children. Included in the space are opportunities for construction and block play, dramatic arts, creative arts, science inquiry, a quiet space to take a break, and outdoor recreation.

Staff

Our teachers understand the developmental needs of children ages 4-6 years. Our teachers make authentic connections that nurture growth in children through creative, fun, respectful, and collaborative relationships.
